

The Lincoln Hotel

Conversion of 2 existing ground floor standard hotel rooms into disabled hotel rooms with en-suite shower rooms.

Purpose: To be able to market the rooms to non-disabled clients by removing support arms and shower seat when not required. At the same time, the customer wanted high quality special needs equipment to meet the requirements of disabled clients when needed.

Eastgate
Lincoln LN2 1PN

Challenge

- ▮ To ensure that the disabled shower rooms were equipped with products that were safe, functional, aesthetically acceptable, and easy to remove and clean.

Solution

- ▮ R4140 Wash basin bracket
- ▮ R2050/RT621 Wash basin and tap
- ▮ R3148 Support arms
- ▮ Shelving
- ▮ R7566 Shower chair
- ▮ RT104/RT600 Shower rail
- ▮ RT756/RT640 Shower mixer and bracket

Effect

- ▮ 2 rooms, 1 for left-handed users, 1 for right-handed users. Both equipped with identical equipment. The rooms now have the products in-situ all of the time, but the equipment may be removed if not required.
- ▮ The result is a solution that meets the needs of most disabled and elderly guests of the hotel. It also means that the hotel meets the requirements of the DDA and can advertise the facilities they have as being of a high standard.
