

Description

Regional centre for rehabilitation of children, adolescents and adults with severe acquired brain injury. The centre accommodates up to a total of 100 patients. In connection with a recent renovation project, the bathrooms were rebuilt and refurnished to satisfy the need for increased flexibility and to allow carers to provide each patient with the best possible care and training, no matter his or her condition.

The Pressalit Care solution

- Tracks on all walls
- R4760 Wash basin bracket, modified
- R3548 Support arms
- RT756 Shower mixer bracket
- RT136 Grab rail system
- R37 Dania Toilet seat

Effect

The flexibility of the bathrooms has increased significantly, and almost any kind of care or treatment can be undertaken. The patients are all severely injured as a result of an illness or accident and require intensive care. A fruitful cooperation between the patient and the carer is vital for a successful rehabilitation, and the bathrooms contribute to this by providing optimal working conditions and safe surroundings.
