

# Denmark Residential Home/Rehabilitation Vor Frue Roskilde

## Description

Conversion of an old nursing home into a modern rehabilitation centre/residential home. The transformation included the creation of new bathrooms catering for the needs of residents with varying degrees of dependency. The bathrooms were further intended to help carers identify the changes needed in a patient's home after discharge.

## The Pressalit Care solution

- Tracks on 3 walls
- R4760 Wash basin bracket
- R2050 Ergonomic wash basin
- R7566 Shower chair
- RT756 Shower mixer bracket
- R3548 Support arm
- Baskets and accessories

## Effect

As part of the conversion project, 4 small bathrooms were combined to form 2 large common bathrooms meeting the needs of dependent as well as independent users. The new bathrooms fulfil the requirements of the Health and Safety at Work act and serve as test rooms for patients needing to transform their bathrooms at home.
